

109TH CONGRESS
1ST SESSION

S. RES. 112

Designating the third week of April in 2005 as “National Shaken Baby Syndrome Awareness Week”.

IN THE SENATE OF THE UNITED STATES

APRIL 15, 2005

Mr. DODD (for himself, Mr. ALEXANDER, Mr. BAYH, Mr. BINGAMAN, Ms. CANTWELL, Mr. COLEMAN, Ms. COLLINS, Mr. DAYTON, Mr. DURBIN, Mr. INOUE, Mr. JOHNSON, Ms. LANDRIEU, Mr. LEVIN, Mr. LIEBERMAN, Mrs. MURRAY, Mr. SALAZAR, Mr. SANTORUM, Mr. SCHUMER, and Ms. SNOWE) submitted the following resolution; which was considered and agreed to

RESOLUTION

Designating the third week of April in 2005 as “National Shaken Baby Syndrome Awareness Week”.

Whereas the month of April has been designated “National Child Abuse Prevention Month” as an annual tradition that was initiated in 1979 by former President Jimmy Carter;

Whereas the most recent National Child Abuse and Neglect Data System (NCANDS) figures show that almost 900,000 children were victims of abuse and neglect in the United States in 2002, causing unspeakable pain and suffering to our most vulnerable citizens;

Whereas among the children who are victims of abuse and neglect, nearly 4 children die each day in this country;

Whereas children age 1 and younger accounted for 41.2 percent of child abuse and neglect fatalities in 2002, and children age 4 and younger accounted for 76.1 percent of all child abuse and neglect fatalities in 2002;

Whereas abusive head trauma, including the trauma known as Shaken Baby Syndrome, is recognized as the leading cause of death of physically abused children;

Whereas Shaken Baby Syndrome is a totally preventable form of child abuse, caused by a caregiver losing control and shaking a baby that is usually less than 1 year in age;

Whereas Shaken Baby Syndrome can result in loss of vision, brain damage, paralysis, seizures, or death;

Whereas a 2003 report in the Journal of the American Medical Association estimates that, in the United States, an average of 300 children will die each year, and 600 to 1,200 more will be injured, of whom $\frac{2}{3}$ will be babies or infants under 1 year in age, as a result of Shaken Baby Syndrome, with many cases resulting in severe and permanent disabilities;

Whereas medical professionals believe that thousands of additional cases of Shaken Baby Syndrome are being misdiagnosed or not detected;

Whereas Shaken Baby Syndrome often results in permanent, irreparable brain damage or death to an infant and may result in more than \$1,000,000 in medical costs to care for a single, disabled child in just the first few years of life;

Whereas the most effective solution for ending Shaken Baby Syndrome is to prevent such abuse, and it is clear that the minimal costs of education and prevention programs may prevent enormous medical and disability costs and untold grief for many families;

Whereas prevention programs have demonstrated that educating new parents about the danger of shaking young children and how they can help protect their child from injury can bring about a significant reduction in the number of cases of Shaken Baby Syndrome;

Whereas education programs have been shown to raise awareness and provide critically important information about Shaken Baby Syndrome to parents, caregivers, daycare workers, child protection employees, law enforcement personnel, health care professionals, and legal representatives;

Whereas efforts to prevent Shaken Baby Syndrome are supported by advocacy groups across the United States that were formed by parents and relatives of children who have been killed or injured by shaking, such as the National Shaken Baby Coalition, the Shaken Baby Association, the SKIPPER (Shaking Kills: Instead Parents Please Educate and Remember) Initiative, the Shaken Baby Alliance, Shaken Baby Prevention, Inc., A Voice for Gabbi, Don't Shake Jake, and the Kierra Harrison Foundation, whose mission is to educate the general public and professionals about Shaken Baby Syndrome and to increase support for victims and victim's families in the health care and criminal justice systems;

Whereas child abuse prevention programs and "National Shaken Baby Syndrome Awareness Week" are supported by the National Shaken Baby Coalition, the National

Center on Shaken Baby Syndrome, the Children’s Defense Fund, the American Academy of Pediatrics, the Child Welfare League of America, Prevent Child Abuse America, the National Child Abuse Coalition, the National Exchange Club Foundation, the American Humane Association, the American Professional Society on the Abuse of Children, the Arc of the United States, the Association of University Centers on Disabilities, Children’s Healthcare is a Legal Duty, Family Partnership, Family Voices, National Alliance of Children’s Trust and Prevention Funds, United Cerebral Palsy, the National Association of Children’s Hospitals and related institutions, Never Shake a Baby Arizona/Prevent Child Abuse Arizona, the Center for Child Protection and Family Support, and many other organizations;

Whereas a 2000 survey by Prevent Child Abuse America shows that half of all Americans believe that of all the public health issues facing this country, child abuse and neglect is the most important;

Whereas Congress previously designated the third week of April 2001 as “National Shaken Baby Syndrome Awareness Week 2001”; and

Whereas Congress strongly supports efforts to protect children from abuse and neglect: Now, therefore, be it

1 *Resolved*, That the Senate—

2 (1) designates the third week of April in 2005
3 as “National Shaken Baby Syndrome Awareness
4 Week”; and

5 (2) encourages the people of the United States
6 to remember the victims of Shaken Baby Syndrome

- 1 and to participate in educational programs to help
- 2 prevent Shaken Baby Syndrome.
